- ✓ English (Intermediate – B1)

PAST PROJECTS

CV website *(click to see it)*

Description: an SPA application written by me as an example of the applied knowledge. CV-app provides information about my skills and showcases my pet projects such as:

- Calculator: a functional calculator that performs basic arithmetic operations. It features a clean, intuitive interface and handles various edge cases to ensure accurate calculations.
- Mini game: a simple interactive game where users click on randomly appearing squares within a set area. The game includes a click counter and allows players to set the game duration. After the time expires, the game displays the total number of successful clicks.
- To-Do list: a to-do list sub-application that enables users to add, delete, and mark tasks as complete or incomplete. Completed tasks automatically move to the bottom of the list, providing an organized and user-friendly experience.

Technologies: Native JS, ReactJS, SCSS, Tailwind CSS
